Habitat Expanding Collaboration

Habitat Expanding Collaboration APPLICATION

A project of Homegrown Habitat

The mission of Homegrown Habitat is to bring the natural world to the public and engage them in supporting nature by expanding native plant habitat where they live, work and play.

By completing this application, you are requesting help and expertise of Sacramento Valley CNPS volunteers as well as reimbursement for the purchase of native plants. We support native plant nurseries in our region including but not limited to: find out farms, Miridae Mobile Nursery, Mother Natives, Cornflower Farms and other nurseries that sell native plants including Talini's and Fair Oaks Blvd Nursery.

1. Project Description:

2. Describe the biodiversity objectives (i.e. Butterfly or Bee Gardening) of the project:
