

WE REUSE POTS! Bring us your pots!

We love native plants because they bring us closer to nature. So, rather than adding more plastic to the environment, we **reuse one-gallon pots**. You can help our plant propagation work by dropping off your one-gallon pots to a Nursery Workday (Mondays & Wednesdays 10-12). Whether it's 1 pot or 100, we want them, please.

We need pots now.

We prepare the pots by brushing them out, then in the summer, we sterilize them in the solarizer (see photo). We use over 4,000 1-gallon pots a year in our nursery program. Also, if your group (10-20 people) would like to help, we can schedule a Pot Washing Party, contact Chris at cnpschris@gmail.com.
