

Greenhouse design help

Larry Washington, architect and husband of former Effie Yeaw director Jamie Washington

Larry provided the plan 11/17/10

The east, south and west walls can be removed to accommodate temperature variations.

Volunteer builders included Dean Mortensen, Jim Wadsworth, Terry Linton, Mike Finan, Al Ludke, Martha and 11 more!

(I think) Jim and Dean came up with how to make the greenhouse sides removable for the summer. Currently Steve Woodward, Robin Rogerson, and Jim Rhorabough are our experts on the removable sides. They developed a system to number them for storing the sides over the summer.
